Art Unit: 2627

1) A Request for Continued Examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/05/2007 has been entered.

2) The amendment filed 9/05/2007 is acknowledged. Claims 1-11 and 16-21 have been canceled. New claims 26-29 are currently been added.

3) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4) Claims 12-15 and 22-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over ALFERNES (7,078,607).

Art Unit: 2627

ALFERNESSE discloses a storage medium having audio tracks embodied therein as claimed in claim 12, comprising N number of audio tracks N number of audio tracks each audio track having stored therein a previously mixed song ( column 3, line 35-46. In this case, each song is capable of mixing in 20 difference ways of guitar solos ), V versions of at least one of the N audio tracks ( column 3, line 35-46. In this case, each song (audio track) could be mixed in difference version V by adding favorite music instruments ), and a control track comprising information for determining which of the V versions is to be played ( figure 6, 620. See column 6, lines 31-33. In this case, the scripts functions as control track for determining which of V versions is to be played. See also figure 7 and column 6, line 48 to column 7, line 5 for creating scripts ), *except to specifically show that the music songs (audio tracks) after mixing with music instruments are stored on a recording medium. However, it is well known in the audio recording art that the music songs (audio tracks) after editing process (easing, adding or mixing with other sound fields) can be recorded to any suitable storage medium for later playing back. Therefore, to record different versions of music songs after mixed with other sound fields on a storage medium as claimed is deem obvious to someone within the level of skill in the art.*

Claims 13-15 are rejected with the same reasons set for in previously Office actions.

Claims 22-25 are rejected with the same reasons set for in previously Office actions.

Method claim(s) 26-28 are drawn to the method of using the corresponding apparatus claimed in claim 12. Therefore, method claims are rejected for the same reasons of anticipation (obviousness) as used above.

As to claim 29 ALFERNES shows media work is video media work ( Fig.2, DVD-ROM 226; Fig.3, DVD-ROM 316 ).

5) Applicant's arguments with respect to claims 12-15 and 22-29 have been considered but are moot in view of the new ground(s) of rejection.
